DETAILED ACTION

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to show a process for displaying quotes on a trading screen used in an automated trading system on which a plurality of trading entities trade, some, but not all, of the trading entities having bilateral credit with one another, those trading entities having bilateral credit with one another being trading counterparties having the details, as set forth in claims that include such elements as the process including displaying a quote made by a first trading entity on at least one trading screen associated with the first trading entity; and providing an indication to the first trading entity that its quote can be accepted by a predetermined number which is more than one but less than all of the first trading entity's trading counterparties, wherein the first trading entity has bilateral credit with another trading entity as a function of an amount of remaining credit a first credit granting entity, which is associated with the first trading entity, has extended to a second credit granting entity, which is associated with the other trading entity. Both Tuck 6,115,698 and Lupien et al 5,101,353 fail to show providing an indication to the first trading entity that its quote can be accepted by a predetermined number which is more than one but less than all of the first trading entity's trading counterparties, wherein the first trading entity has bilateral credit with another trading entity as a function of an amount of remaining credit a first credit granting entity, which is

associated with the first trading entity, has extended to a second credit granting entity, which is associated with the other trading entity
